NeuronovAI (NRXAI) - Whitepaper

Table of Contents

---

1. Introduction

NeuronovAI is a project that aims to bring an innovative and science-based perspective to the crypto ecosystem by merging neuroscience with artificial intelligence. Its native token, **NRXAI**, operates on the BNB Smart Chain (BSC) and complies with BEP-20 standards. While developing future-oriented AI technologies, we maintain a commitment to scientific foundations. **Our ultimate goal is to create new value at the intersection of artificial intelligence and neuroscience.**

---

2. Vision & Mission

Our Vision: NeuronovAI aims to develop more advanced AI models by studying the structure and mechanisms of the human brain. Through this, we target the creation of high-efficiency systems with optimized performance and enhanced learning capabilities.

Our Mission: To conduct scientific research and R&D (Research and Development) activities supported by laboratories in order to develop breakthrough technologies in artificial intelligence and neuroscience-based applications.

---

3. Problem Identification

- Current AI models often follow learning paths that lack biological foundations.
- Many crypto projects lack real-world utility.
- Projects without scientific grounding struggle to create long-term value.

---

4. Solutions & Technology

NeuronovAI develops software, databases, and machine learning infrastructures that redesign AI models based on neuroscience principles. The resulting solutions are:

- Tested in R&D laboratories
- Developed in collaboration with academic partners

• Integrated with blockchain infrastructure

---

5. Tokenomics

- **Total Supply:** 13.45 Billion NRXAI
- **Locked Supply:** 5 Billion tokens locked for 5 years
- **Circulating Supply:** 1.45 Billion tokens will be initially released into the market
- **Reserve Supply:** 7 Billion tokens allocated for project development, marketing, and strategic partnerships

Reserve Supply Breakdown:

Use Case	Amount (NRXAI)	Percentage
R&D and Product Development	2.5 Billion	35.7%
Marketing & Advertising	1.0 Billion	14.3%
Strategic Partnerships	2.0 Billion	28.6%
Community Incentives & Airdrops	0.45 Billion	6.4%
Security & Reserve Fund	1.05 Billion	15.0%
Total	**7 Billion**	**100%**

Important Note: No token will be sold **below the launch price**. This commitment applies to all investors, including early supporters. Project funding will be secured without compromising token price stability.

---

6. Roadmap

Q3/Q4 2025

- Token distribution
- Website and logo launch
- Smart contract verification (Verified on BscScan)
- Community building
- Whitepaper release
- CEX listings
- Sharing of scientific content
- Promotion on professional platforms like LinkedIn and Medium
- Launch of NeuronovAI's first neuroscience-based AI model prototype to the community

2026 and Beyond

- Academic partnerships
- Laboratory establishments
- Development and release of new neuroscience-integrated AI products

---

7. Team

The project team consists of experienced individuals from the fields of artificial intelligence, neuroscience, blockchain development, and marketing.

---

8. Legal Disclaimer

This document is not an investment advisory; it is an informational document about the project. The NRXAI token may carry speculative characteristics. Potential participants must act at their own discretion. All risks lie with the token holder.
